EDUCATION

B.Tech in Computer Science and Engineering

Maharaja Agrasen Institute of Technology

08/2023 - 05/2027 | New Delhi, India

SUMMARY

I am an enthusiastic computer science student with a strong foundation in machine learning and software development. My experiences include internship at DRDO where I improved model accuracy and developed data pipelines. I have also successfully led projects like KrishiBodh, leveraging AI for agriculture. I am passionate about applying technology to solve real-world problems and eager to contribute my skills in a challenging role.

EXPERIENCE

Machine Learning Intern

Defence Research and Development Organisation (DRDO)

06/2025 - 07/2025 | New Delhi, India

An institute dedicated to the development of defense technology and systems

- Built and optimized classification models using Logistic Regression and Neural Networks for defense-oriented analytical systems, improving model accuracy from 94% to 96% through architecture refinement and hyperparameter tuning
- Designed end-to-end data preprocessing and feature engineering pipelines using Python (NumPy, Pandas, scikit-learn) to handle structured datasets for defense analytics
- Evaluated model performance using precision, recall, F1-score, and cross-validation techniques; collaborated with senior research scientists to validate robustness and reliability

SKILLS

Technical Skills

Data Structures	Java	C++	Python	JavaScript
REST	OOP	React	Node.js	Express.js
MongoDB	SQL	Google Firebase		

Soft Skills

Leadership	Collaboration	Problem Solving
Communication	Creativity	Time Management
Adaptability	Critical Thinking	

PROJECTS

KrishiBodh

AI-Driven Smart Agriculture Advisory Platform

- Architected a full-stack AI-powered agriculture advisory platform for intelligent crop planning and yield optimization, serving farmers with data-driven agricultural insights
- Implemented machine learning-based crop recommendation models using environmental and seasonal parameters; integrated real-time weather and market price APIs to provide dynamic, actionable insights
- Ranked **Top 4 out of 1000+ teams** in IBM-evaluated innovation challenge; selected for presentation at the India AI Summit

Network Traffic Classifier – TOR vs Non-TOR Detection

Traffic classification system using deep learning

- Developed a deep learning-based traffic classification system to distinguish TOR and Non-TOR network flows using neural network architectures enhanced with attention mechanisms
- Boosted classification accuracy from 94% to 96% through architecture optimization and hyperparameter tuning; evaluated model performance using precision, recall, F1-score, and confusion matrix analysis

DevConnect

Developer Social Networking Platform

- Built a full-stack social networking platform enabling developers to share projects, technical blogs, and collaborate on code repositories
- Designed and implemented RESTful APIs for authentication, post management, and user interaction workflows with secure authentication

KEY ACHIEVEMENTS

AI Innovation Challenge Success

Ranked **Top 4 out of 1000+** teams in IBM-evaluated AI Innovation Challenge (KrishiBodh); **selected for presentation at the India AI Summit**

Finalist (2x)

NSUT Ideathon – technology driven solution design competition hosted by Netaji Subhas University of Technology

Runner-Up

HackCodex Hackathon – developed production-ready full-stack solution under time-bound constraints, demonstrating rapid prototyping and implementation skills
